

WHAT IS HACKATHON?

This OA Hackathon event at the 2020 National Order of the Arrow Conference will be truly unlike anything the Order of the Arrow has ever seen. Youth and adults at NOAC will be given the opportunity for technology ideation, to discuss solutions for the problems every lodge encounters, and create tangible solutions which they can bring back home!

This hands-on, high-energy event will focus on identifying problems, engaging creativity, and building solutions at all levels of the organization.

Delegates will experience engaging trainings, a creativity and ideation session, and a typical 'hackathon' competition. Similarly, delegates will be provided with feedback about current programs in the OA and prompted to 'hack' a solution together.

Join us on Thursday and Friday at NOAC to #HackOA and bring home emerging technology.

Register for NOAC and the 2020 OA Hackathon today at: noac2020.org

EXPECTATIONS

The 2020 OA Hackathon will require you to supply a laptop yourself for the program. It is highly encouraged to have coding and other technology experience before NOAC 2020.

ABOUT HACKATHON

The 2020 OA Hackathon will begin at 9:00AM on Thursday, August 6 at the 2020 National Order of the Arrow Conference and conclude on Friday, August 7 at noon. This 27 hour experience will be akin to a collegiate hackathon found at colleges including and comparable to Michigan State University. We are excited to bring this inclusive program to NOAC this year!

TRAINING

Training at the 2020 OA Hackathon at NOAC will be focused on three objectives:

- 1) Current and emerging technology of the OA.
- 2) High Performing Lodges and the integration of technology.
- 3) Problem solving and project management, specifically in regard to software development.

This series of training will prepare delegates for an immersive technology competition focused on the betterment of their chapters, lodges, and sections. These trainings will also allow Arrowmen to *step forward* as they identify how technology will impact the OA and how to leverage technology to *step up* to thrive.

EXCITING OPPORTUNITIES

Throughout the event will have exciting activities such as virtual reality and demonstration of world-class technology. We will also have coaching and troubleshooting to assist with all facets of the delegates' competition projects and ideas.

This is the first OA Hackathon at the National Order of the Arrow Conference and the opportunities are endless. Make sure to register for NOAC and sign up for the OA Hackathon @ NOAC!
